

MS Outlook Integration

Enterprise Module

Overview

- **Drag-and-drop emails** and attachments to folders within Alfresco
- Automatically **strip off file attachments** to be saved as separate, as related documents
- Use **custom metadata** allows you to capture and categorize documents (like an invoice or a contract) for easy retrieval and search
- Find content more quickly with **search filters** within email, documents, folders, and sites
- Securely **share emails** and associated documents from within Alfresco
- Simply **attach links to documents to email** to other Alfresco users

What are the requirements?

- It is a paid for module and specific licenses are needed
- Requires the Alfresco Enterprise Edition
- Outlook Support:
 - Outlook 2007 (will be phased out in 2017 as Microsoft ends extended support for Outlook 2007)
 - Outlook 2010
 - Outlook 2013
 - Outlook 2016
- Windows Support
 - Windows 7
 - Windows 8.1
 - Windows 10 (In combination with Outlook 2016)
