Alfresco Explorer Webapp (No longer available)

The screenshot shows a web browser window with the URL 172.16.10.143:8080/alfresco/faces/jsp/login.jsp highlighted with a blue box. The page title is "My Alfresco Dashboard". The left sidebar has a "Navigator" section with "My Alfresco" selected, showing links for "Company Home", "My Home", and "Guest Home". The main content area is titled "My Alfresco Dashboard" and includes sections for "Getting Started" (with "Alfresco" and "Common Tasks" sections) and "My Tasks To Do". The "Common Tasks" section lists four items: "Browse items in your home space", "Create a space in your home space", "Add content to your home space", and "Create content in your home space". At the bottom, there is a table titled "My Tasks To Do" with one row of data.

Android Mobile App

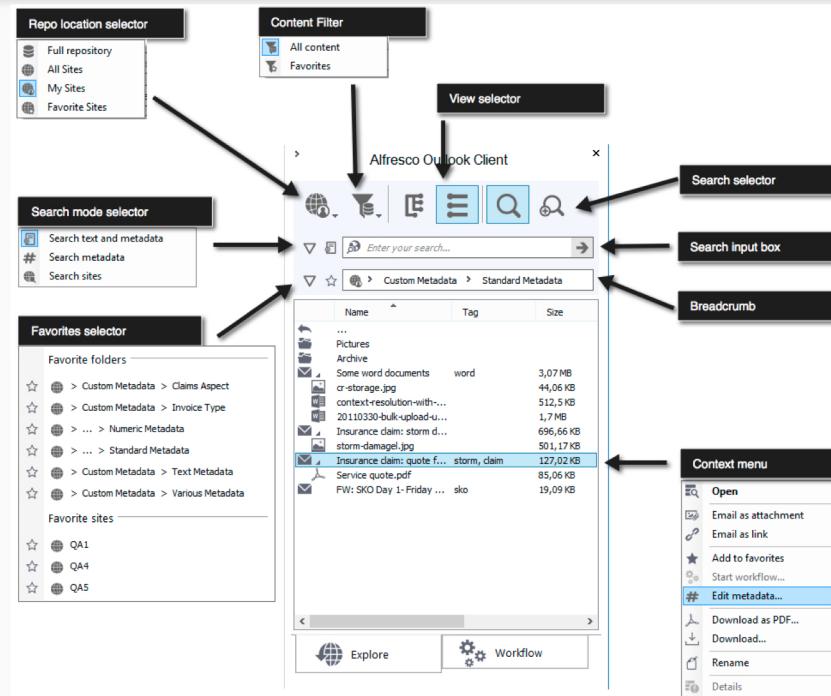

Alfresco Mobile connects to Alfresco in the cloud and Alfresco on premise servers* to provide safe access to your corporate documents on the go.

E-Mail (IMAP) - no install required

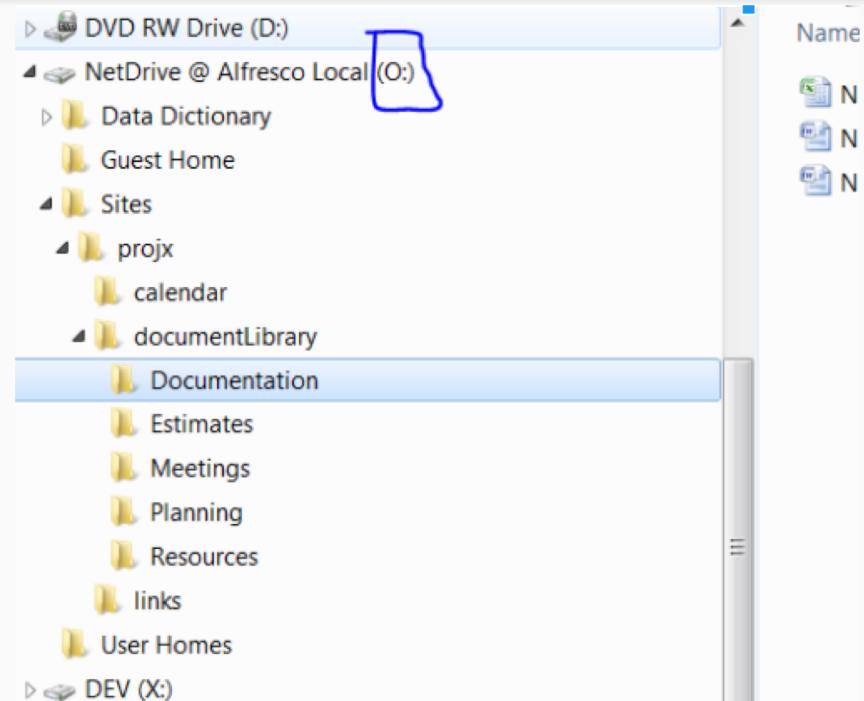

E-Mail (Outlook integration) installation in Outlook and Alfresco required

WebDAV

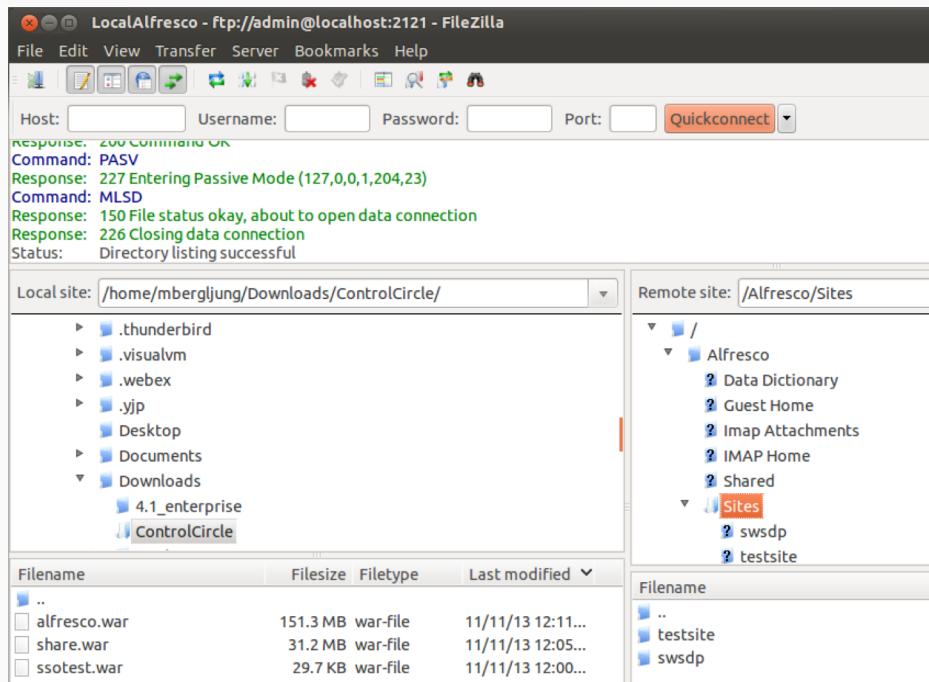

- Users can map drive to Alfresco
- Work in the way you are used to
- Different WebDAV clients are available such as NetDrive and WebDrive
- Good because it is based on HTTP, so goes through firewalls

CIFS

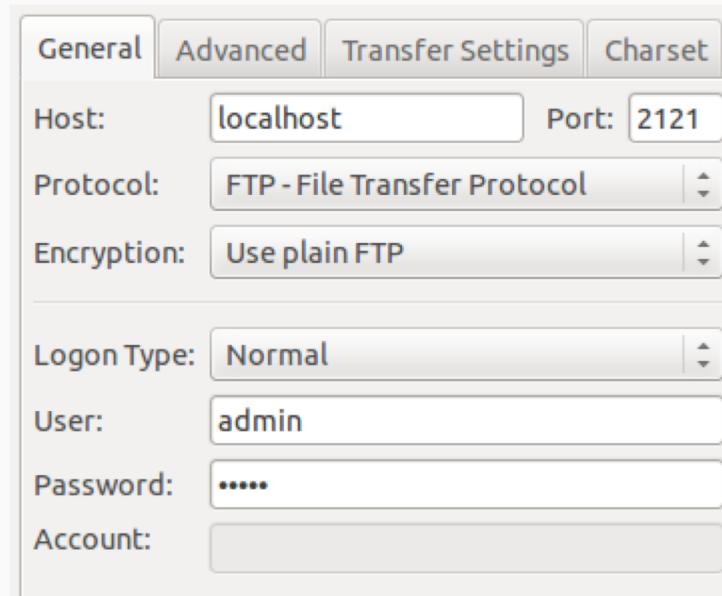

- Users can map drive to Alfresco
- Available in Windows so no client installation is necessary
- WebDAV is preferred as CIFS requires the following ports opened in the Firewall: 137, 138, 139, 445

FTP

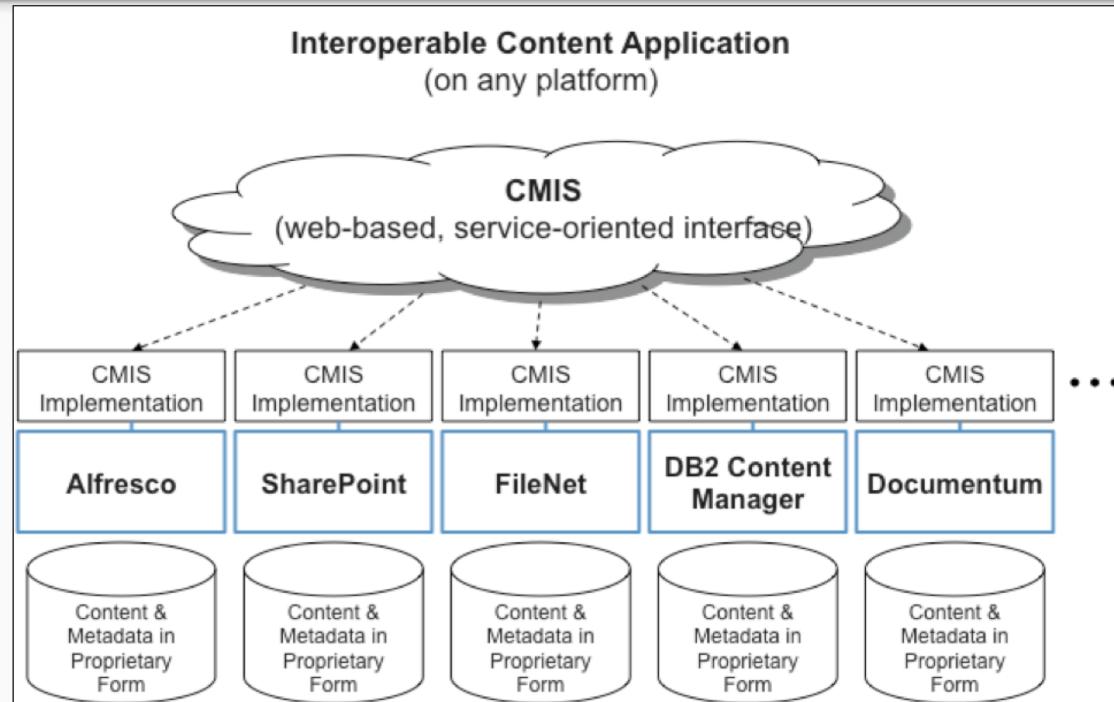

FTP - Exercise

- Use NetDrive to connect over FTP or use FileZilla

Protocol Client: CMIS

Drupal

The CMIS API and CMIS Views

Modules can be used

Alfresco Info

Submitted by [admin](#) on Thu, 01/31/2013 - 20:54

This is some general information about Alfresco.

Alfresco is a content management system that can be used to manage any type of content.

It also provides collaboration features such as wiki, discussions, calendar, document library, data lists.

Content in Alfresco can be accessed via the CMIS standard interface.

Mule (ESB)

ESBs, such as Mule, can be used to integrate with ECM systems supporting CMIS

Mule has the **CMIS Cloud Connector**:

Alfresco Desktop Sync

Files and folders synced between Alfresco and desktop

Initial sync starts to sync the selected Alfresco files and folders to your desktop.
